## NEW <br> F) 1 <br> reinforced ptfe mesh <br> 

RPM's unique circular macroporous design allows for direct contact between the bone graft and periosteum, allowing naturally occurring revascularization and infiltration of cells into the bone graft.

## Hybrid Approach:

Adaptability of a membrane with the porosity of a mesh

Circular Macropores allow direct
contact between bone graft and periosteum, allowing naturally occurring revascularization and infiltration of cells into the bone graft

Titanium Frame maintains space essential for horizontal and vertical ridge augmentation

# CASE STUDY: Ridge Augmentation Using Reinforced PTFE Mesh 

$\%$ Case Photos Provided by Istvan Urban DMD, MD, PhD

1. Labial view of an atrophic posterior mandibular area.

2. A 1:1 mixture of autogenous and xenogenic bone graft is placed on the ridge. Cortical bone was perforated, and an RPM Reinforced PTFE Mesh was secured on the lingual side before applying bone graft.

3. An RPM is secured over the graft with titanium pins and screws.

4. After 9 months of healing the augmented site is exposed, and the RPM will be removed.

5. \& 6. Labial and occlusal views of the regenerated bone after 9 months of healing.

## Versatile Rectangular Shapes

These configurations can be trimmed to fit a variety of defects

PS
$20 \mathrm{~mm} \times 25 \mathrm{~mm}$

PL
$25 \mathrm{~mm} \times 30 \mathrm{~mm}$

XL
$30 \mathrm{~mm} \times 40 \mathrm{~mm}$

XLK
$30 \mathrm{~mm} \times 40 \mathrm{~mm}$

XLKM
$30 \mathrm{~mm} \times 40 \mathrm{~mm}$

## Shapes with Fixation Points

These configurations are designed with fixation points outside of the defect area

BL
$17 \mathrm{~mm} \times 25 \mathrm{~mm}$

PST
$25 \mathrm{~mm} \times 36 \mathrm{~mm}$

PLT
$30 \mathrm{~mm} \times 41 \mathrm{~mm}$

## Interproximal Shapes

These configurations are designed to fit between existing teeth

ATC
$24 \mathrm{~mm} \times 38 \mathrm{~mm}$

ATCM
$24 \mathrm{~mm} \times 38 \mathrm{~mm}$

PTC
$38 \mathrm{~mm} \times 38 \mathrm{~mm}$

PTCM
$38 \mathrm{~mm} \times 38 \mathrm{~mm}$

PD
$38 \mathrm{~mm} \times 38 \mathrm{~mm}$

PDMR
$38 \mathrm{~mm} \times 38 \mathrm{~mm}$

PDML
$38 \mathrm{~mm} \times 38 \mathrm{~mm}$
